

HIGH SCHOOL CAREER COACHES

Coaching helps the “middle majority” students – the mainstay of the emerging workforce – prepare for college and careers. Career coaches offer unique benefits to students that traditional guidance counseling may not, such as direct access to college programs and services, postsecondary faculty, and business and industry. BRCC, in collaboration with local school divisions, has a career coach at each of 12 local high schools. <https://www.brcc.edu/student-support-services/career-services/high-school-career-coaching/>
